How can I change the delivery time for my package?

You can use [FedEx Delivery Manager®](#) to schedule or change a residential delivery. This is a premium service, and prices vary based on location. There are other free FedEx Delivery Manager features you could try:

- Get delivery notifications and alerts to stay informed.
- Ask your driver to leave your package in a specific spot.
- Request to redirect a package that's already on its way to a retail location. Then, pick it up when it's convenient for you.
- Place a vacation hold on deliveries for up to 14 days.
- Virtually sign for a package from your phone or computer.

Consider downloading the free [FedEx® Mobile app](#) to ship and track from your phone. You can access FedEx Delivery Manager perks to help customize your deliveries on the go.
